Summary

Experienced Computer Science professional with 1.5 years of hands-on experience, eager to secure a challenging role within your esteemed company. Proficient in applying my knowledge and expertise to make meaningful contributions to your team. Committed to continuous learning and excellence, I aim to leverage my programming capabilities to drive innovation and success for your organization. Excited to bring my skills to a dynamic environment, contributing to both team goals and my personal growth.

Experience

Software Engineer I

7Vals · Lahore, Punjab   06/2022 - Present

I am currently working as a Software Engineer. I am providing my services as a Ruby on Rails Developer to develop new features and maintain existing ones.

My Responsibilities include:

- Designing and developing new features.
- Improving product performance
- Fixing production bugs
- Mentoring junior engineers
- Adding new features and fixing existing bugs for Zendesk Integrated apps.
- Adding new features and fixing existing bugs for JIRA Integrated apps.
- Actively participating in code reviews and providing constructive feedback to improve code quality.

Associate Software Engineer

Frizhub Solutions · Lahore, Punjab   06/2021 - 02/2022

I Worked as an Associate Software Engineer at Frizhub.

My Responsibilities included:

- Integrating REST APIs into React.js on the front-end.
- Building REST APIs, including Socket APIs, with Node.js.
- Resolving issues occurring in the production environment.
- Refactoring code within the Microservices architecture.
- Optimizing database queries.

Freelance Web Developer

Fiverr   08/2019 - 03/2021

I worked on Fiverr for one year. During this period, I completed numerous projects in the following fields

- Full Stack Development in MEAN and MERN Stack.
- Worked on tasks related to both SQL and NoSQL databases.
- Deployed web projects for clients on Heroku and Netlify.
- Completed basic and complex Data Structure projects.
- Linux-based tasks such as threading and scheduling.
- OOP based tasks in java, python,C# and C++

Projects

- **University Time Table Scheduler (MERN Stack):** A time table generator that generates a time table by using limited number of classes,rooms and working hours.

- **Desert Sign (MERN Stack):** A Big online store of different products. Users can order, track and pay for products online.
- **Wakeel Online (MERN Stack):** An online platform to hire lawyers. Users can live chat, disucuss their issues and hire them.
- **Restaurants Club (MERN Stack):** A platform to automate the building and deployement of new websites for restaurants on users's requirenments.
- **Reading Assistant (React.Js and Firebase for Web & React Native for Mobile):** User will input an image of text document from where he/she wants to read and then this system will highlight and display the correct and incorrect words while he/she is speaking.
- **Real Time Chat Application (React with Socket.io):** Users can send and receive messages on real time.
- **Ecommerece Website (MEAN Stack):** A fully functional ecommerece website with user authentication and authorization.
- **Board Examinations Management System (C# .Net with MSSQL as database):** Management system that manages data of all the the exams, results, date sheets,roll number slips and registered schools under a specific board
- **Linux Shell (C):** A shell to run several linux commands.
- **GUI based Snake Game (C++ with SDL2 GUI library):** A Data Structure project of Classic snake game using Queue data structure with 2D graphics.

Education

BS(CS)
University of Engineering and Technology, Lahore   06/2022
I completed my Graduation with 3.64 CGPA.

FSc Pre-Engineering
Government Degree College Mian Channu   09/2017
I completed my intermediate with 91% marks.

Skills

ReactJS, JavaScript, Node.js, Express.js, Ruby, Ruby on rails, SQL, MongoDB

Tools and Technologies

[Visual Studio, Visual Studio Code, Android Studio, MS SQL Server, MongoDB Compass Community, Xampp, Postman, GitHub, Heroku]
